Sofia

16.11.2024

10:00 a.m. – 11:00 a.m Redefining BAM's guiding values

Values in organisational culture are the underlying beliefs and principles that guide the behaviour and decisions of members of the organisation. They create the framework within which relationships are formed and developed between members and between the organisation and its external partners.

Based on the survey conducted over the summer, we will identify the four guiding values that we share and that guide the Association's activities.

This activity is for BAM members only!

11:00 a.m – 1:00 p.m. "Music therapy in the treatment of communicative disorders", collegium, presenter Teodosi Tsinguilev

The workshop is inspired by the idea of music in the therapeutic process as resonance in the context of working with children with communication disorders. Through feedback from the group the quality of relationships within the therapeutic setting will be explored. Opening up a space of expression for the child and sounding it out becomes an alternative to insistent attempts and expectations to make contact when sound finds opportunities for contact where the person behind it struggles.

**Participation in the Collegium is paid. Price: 20 BGN.
For BAM members and students at MTI-S.**
